Call for Paper

<http://gifre.org/current-issue/journals/GJEDT>

**Author can submit paper at any time via e-mail: editorgjedt@gifre.org
OR
editorgjedt@gmail.com**

Global Journal of Engineering, Design & Technology (GJEDT) is a **Bi-monthly (February, April, June, August, October, & December)** online peer-reviewed international research journal published by *Global Institute for Research & Education (GIFRE)* to provide a platform to professors, scholars, academicians, professionals and students, for publishing paper in the field of engineering, design & technological research. **GJEDT** is accepting the original paper for publication, which are not published or not under consideration for publication anywhere else. The Journal covers a wide range of interest in the field of engineering, design & technology. Subject areas suitable for publication include, but are not limited to the following fields:

- Design strategies
- Usability and adaptability
- Material, component and systems performance
- Process control
- Alternative and new technologies
- Organizational, management and research issues
- Human factors
- Environmental, quality and health and safety issues
- Cost and life cycle issues
- Sustainability criteria, indicators, measurement and practices
- Risk management
- Entrepreneurship Law, regulation and governance
- Design, implementing, managing and practicing innovation
- Visualization, simulation, information and communication technologies
- Education practices, innovation, strategies and policy issues.
- Computational Statistics

- Computer Business Ethics
- Corporate Governance
- Customer Relationship Management
- Data Mining
- Data Retrieval
- Database Management System
- Decision Support System
- Security Systems and Technologies
- Security, Privacy and Trust
- Service oriented middleware
- Software Engineering
- Emerging paradigms
- Advanced Computing Architectures
- Artificial Intelligence,
- Broadband and intelligent networks
- Broadband wireless technologies
- Cloud Computing and Applications
- Collaborative applications
- Communication architectures
- Communication systems
- Computational intelligence
- Computer Vision
- Computer-based information systems
- Computing Ethics
- Cryptography
- Distributed Computing
- Encryption
- Energy-efficient and green pervasive computing
- Evolutionary computing and intelligent systems
- Expert approaches
- Fuzzy algorithms
- Fuzzy logics
- GPS and location-based applications
- Green Computing
- Grid Networking
- Image and Multimedia applications
- Industrial applications of neural networks
- Information and data security
- Information indexing and retrieval
- Information Management
- Information processing
- Information systems and applications
- Information Technology and their application
- Internet Services and Applications
- Internet Technologies, Infrastructure,
- Location Based Services
- Mobile Computing and Applications
- Mobile networks and services
- Multimedia Communications
- Natural Language Processing
- Network management and services
- Pattern Recognition
- System security and security technologies
- Technology in Education
- Virtual reality
- Vision-based applications
- Web Technologies

- Wireless technology

Key journal audience includes all practitioners, professionals and clients in the engineering, design and technology sectors including but not exclusive to:

- Civil engineers
- Electrical and electronic engineers
- Mechanical engineers
- Structural engineers
- Safety engineers
- Information and communication engineers
- Architects
- Graphic designers
- Building surveyors
- Construction managers
- Project managers
- Quantity surveyors
- Facilities managers
- Contractors
- Property developers
- Researchers
- Research managers
- Policy makers
- Instructors
- Educators
- Trainers
- Postgraduate students

Note: Before submitting manuscript please refer author guidelines.
